

Changes in the Index Manuals

BSE Release - Budapest, August 15, 2018

The Board of Directors of the Budapest Stock Exchange Ltd. decided to amend the Hungarian Indices and CETOP Manuals by Resolution No. 43/2018.

Major changes can be summarized as follows.

BUX and BUMIX

- Rules for equity series with low weight (section 3.8 of the Hungarian Indices Manual):
 - equity series below 0.1% weight cannot be included in the index at regular index review,
 - deliberation is applied when determining index membership in the case of new index-member candidate equity series having weight between 0.1% and 0.3% at regular index review.

BUX, BUMIX and CETOP

- Free float rules are modified so that 5% share blocks considered to remain part of the free float (section 3.6 of the Hungarian Indices Manual, section 3.5 of the CETOP Manual). (Currently the exactly 5% share blocks are not part of the free float.)
- Besides split, reverse split will be also listed among the company events (section 4.2.3.14 of the Hungarian Indices Manual, section 4.2.3.12 of the CETOP Manual)

The new index manuals become effective on September 1st, 2018.
