CEE Trader available for Xetra 17 / T7 simulation system

Dear Sir or Madam,

We are pleased to inform you that CEE Trader will be made available for Xetra 17 and Xetra T7 for testing purposes as scheduled on 8 November 2017.

New software version

With this version of the CEE Trader you automatically receive improvements. For instance portfolio management system or chart improvements.

An overview of the improvements can be obtained here:

<http://software.infrontservices.com/whatsnew/80/>

Please check with your system administrator to get version 8.0 installed, to be able to test the MiFID II requirements in simulation system.

CEE Trader is available for download:

<http://software.infrontservices.com/Terminal/InstallCeeTrader80.exe>

<http://software.infrontservices.com/Terminal/InstallCeeTrader80.msi>

Due to the slightly changed menu structure Wiener Börse recommends to install version 8.0 within a different system directory (manual installation, change installation path) to get familiar with the system and the new fields prior to the usage in production.

CEE Trader version 8.0 is backwards compatible, and thus can be used for production already.

CEE Trader / CEESEG FIX Circular 004/17

Order Entry

We attached a short manual for the new order entry and order/trade window, to give you an overview which information is to be filled into which new field.

Further we want to remind you that the new fields have to be filled with the launch of Xetra 17 on 20 November respectively with the launch of T7 6.0 on 4 December.

With these dates the CEE Trader version 8.0 is mandatory, as with prior versions no fields are available.

Please do not hesitate to contact us for any further questions either by [e-mail](#) or by phone +43-1-53165-170.

Kind regards,

CEE Trader / CEESEG FIX Team of Wiener Börse
